WHEELCHAIR USERS AND THEIR NEEDS ARE DIVERSE
WHAT IS AN APPROPRIATE WHEELCHAIR?

- Meets the user’s physical, environmental, and lifestyle needs
- Provides proper fit and postural support
- Safe and durable
- Can be obtained and maintained locally
- Affordable

Without these key steps, wheelchairs are often of no benefit or abandoned, and may cause physical harm.

1. Assessment
2. Fitting
3. User training
4. Follow up

CLASP offers a variety of appropriate wheelchairs to meet a broad range of users’ needs

Products selected through a competitive bidding process by a Product Advisory Council

Products comply with international quality assurance standards in manufacturing and durability

CLASP offers a one-year limited warranty and spare parts that may not be locally available

Wheelchair users may live, work, or study in urban or semi-urban environments.

Best for indoors with limited space to maneuver and/or paved roads and smooth sidewalks.

CLASP offers a variety of durable wheelchairs designed to navigate these settings as efficiently and safely as possible.

Generally provided through basic level service.

Suitable for users who have adequate balance and who need less support to sit upright.
URBAN AND SEMI-URBAN MANUAL WHEELCHAIRS

Key Features

- Small casters and short wheelbase wheelchairs work well in environments with smooth ground.
- Short overall length increases maneuverability in tight spaces.
- Lighter weight for an easier push and transportability.
- Adjustable rear wheel position allows the wheelchair to be configured for a more efficient push and stability to navigate obstacles.
- Not suitable for users who need additional support to sit upright.

Weights are largest size of each wheelchair with all standard accessories attached, go to clasphub.org for more information. Folding wheelchairs may need more maintenance as they have more moving parts.
Wheelchair users may live, work, or study in environments with rough terrain such as uneven or dirt roads, grass, rocks, or inaccessible sidewalks.

CLASP offers a variety of rugged wheelchairs designed to navigate adverse conditions efficiently and safely.

Generally provided through basic level service.

Suitable for users who have adequate balance and who need less support to sit upright.
ALL-TERRAIN MANUAL WHEELCHAIRS

Key Features

- Wheelchairs with a long wheelbase and large casters are more stable and are easier to push over rough terrain.
- Suitable for long-distance travel.
- Longer overall length makes it difficult to maneuver in tight indoor space.
- Adjustable rear wheel position allows the wheelchair to be configured for a more efficient push and stability to navigate obstacles.
- Not suitable for users who need additional support to sit upright.
